*Innocent political prisoner, government frame-up victim, journalist, author and lifelong fighter for human freedom and dignity, Mumia Abu-Jamal and 10,000 other prisoners have been denied readily available medical treatment to cure Hepatitis C. Mumia contracted Hepatitis C, a liver disease that can remain dormant for decades, when he received a hospital blood transfusions in 1981 following his near death shooting at the hands of Philadelphia police. When PA prison authorities recently rejected Mumia's request for medical treatment, a Pennsylvania judge, *in anticipation* of Mumia's appeal to PA courts, literally drafted a rejection of this appeal *before* Mumia's attorneys submitted it! ** For Oakland meeting only
